INTERNSHIPS

Rapturous Technology Pvt. Ltd. – Remote

Feb 2024 – May 2024

React Native Developer

- Developed and deployed cross-platform mobile applications for Android and iOS using React Native.
- Integrated RESTful APIs and managed complex application state using Redux for smooth user experience.
- Collaborated with design and backend teams to implement scalable, maintainable UI components.

REDX-AI Club, KJSIT – Mumbai

Jul 2023 – Aug 2023

Mobile App Developer Intern – Suraksha Women Safety App

- Built a multilingual (3-language) Android and iOS application using React Native, leveraging i18n for localization.
- Integrated Firebase Authentication (email, password, phone) and Firestore for real-time database functionality.
- Applied design principles and testing best practices to ensure high reliability and usability.

Software Development Cell, KJSIT – Mumbai

Mar 2022 – May 2022

Web Developer – Examination Management System

- Designed and developed a full-stack web application using ASP.NET for managing university examination workflows.
- Integrated MS SQL Server for secure, structured database operations including student records and exam data.
- Gained experience in RESTful services and SQL database querying.

PROJECTS

TrackaExpense – Expense Tracker App

[GitHub](#)

- Built a cross-platform Android app using React Native for tracking daily income and expenses.
- Created animated visualizations using react-native-charts, added bill-splitting, and managed global app state efficiently.
- Implemented best practices for performance and scalability.

SkillFlexCV – Resume Builder Website

[GitHub](#)

- Developed a responsive resume builder web application using React with dynamic form inputs and live preview.
- Implemented Firebase Authentication for secure login and used Firestore to store user-generated resume data.
- Applied user-centric design and accessibility principles.

RoboFriends – Robot Directory Web App

[GitHub](#)

- Built a dynamic React web application that fetches user-submitted robot data from Google Sheets via the OpenSheet API.
- Integrated the Robohash API to generate unique robot avatars based on user input.
- Added search functionality with fuzzy matching and responsive design.
